Description

It's time to bow down before the all-mighty spirit lord of the dead, Baron Samedi! Yggdrasil's November launch will take you to the magical world of voodoo, where the mischievous baron summons great riches for players.

The game features an other-worldly 36 collectible features, including wilds, multipliers, guaranteed winlines, stacks and mystery symbols. The features are represented by tarot cards and every time at least two scatters hit the reels, three cards appear to bestow their bounty on the reels and also fill their corresponding collections!

Two scatters give the player one respin with 3 features active and 3-5 scatters does the same for Free Spins round of 7-15 spins. Filling any of the 36 feature collections initiates 3 Collection Free Spins with the corresponding feature active.

So seize the moment, mortal, as the baron will guarantee that the dark magic sides with you for feature combos unseen in the realm of the living!

HOW TO PLAY

- Select your coin denomination.
- Press the Spin button to start the game.

HOW TO CALCULATE PAYLINE WINS

- To calculate your total payline coin win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line. If the payline pays from left, then start counting from the far left. If the payline pays from right, then start counting from the far right.
- If three or more identical symbols are lined up, find the coin win value in the Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row, and 5 in a row. Only the highest winning combination per line is paid out.
- The above doesn't include any Free Spin symbols which pay scattered.

- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- Calculate the total win in your home currency by multiplying the total coin win with your coin value.
